

## FFP3V Moulded Disposable Mask with Valve – KP39211 – Box of 10

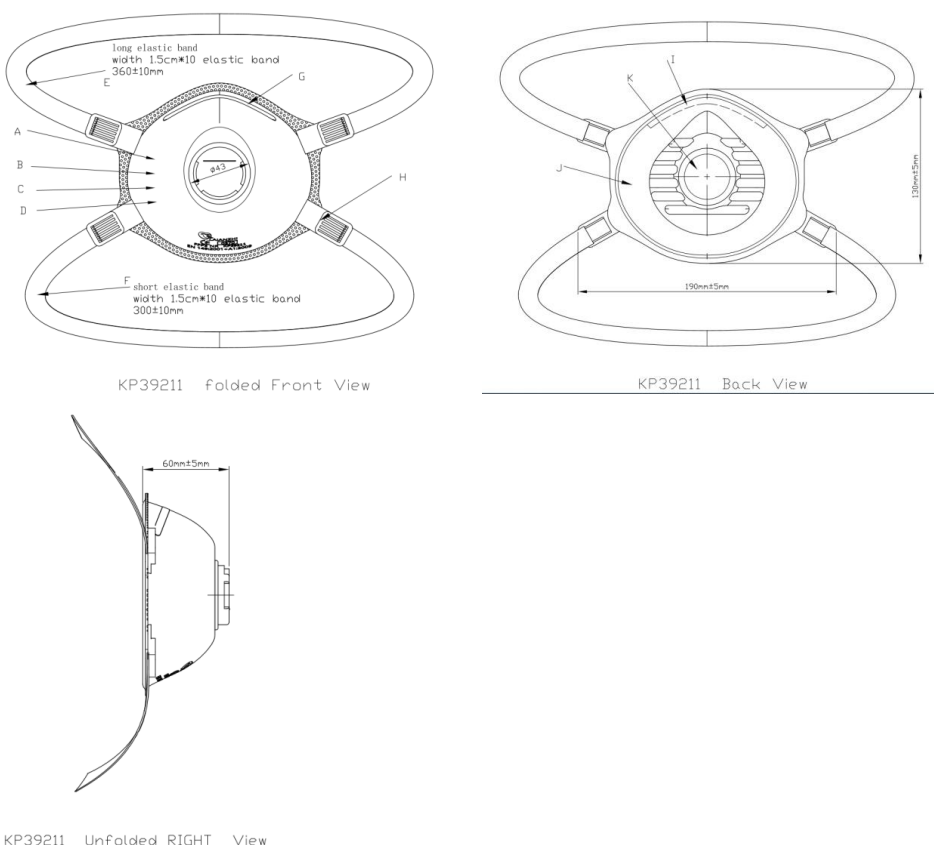

**CONFORMS TO: EN149:2001+A1:2009**

### 1. Product description

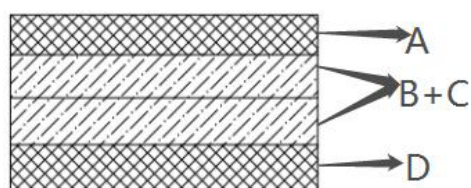

|                    |                                                            |
|--------------------|------------------------------------------------------------|
| Product name       | LAIANZHI 9108A SERIES CUP SHAPE DISPOSABLE PROTECTIVE MASK |
| Specification      | 19cm*13cm*6cm                                              |
| Product Model      | KP39211                                                    |
| Main raw materials | Non-woven (66.7%) Melt blown fabric (33.3%)                |

### 2. Product Drawing

#### 2.1 Fig 1 The schematics of KP39211

#### 2.2 Fig 2 Components of KP39211

- A. Outer cover: Needle punch
- B. (B+C)Filter media: Melt blown fabric
- D. Inner cover: Needle punch

A. Needle punch; B. Melt Blown Fabric; C. Melt Blown Fabric; D. Needle punch; E. Long

elastic strap; F. Short elastic strap; G. Nose-piece; H. Ear buckle; I. Sponge Sticker; J.EVA lining; K. Exhalation valve

### 3. BOM List

| No. | Components         | Materials                                               | Function                     |
|-----|--------------------|---------------------------------------------------------|------------------------------|
| 1   | Outer layer        | White Needle punch                                      | Prevent from the particulate |
| 2   | Filter media layer | Melt blown fabric                                       | filter particulate matter    |
| 3   | Inner layer        | White Needle punch                                      | Prevent from the particulate |
| 4   | Nose-clip          | Aluminium                                               | Adjustable to fit the face   |
| 5   | Elastic strap      | Polyester+spandex                                       | To fix the mask for wearing  |
| 6   | Sponge Sticker     | Sponge                                                  | Comfortable to wear          |
| 7   | Ear buckle         | plastic                                                 | To fix the mask for wearing  |
| 8   | EVA lining         | EVA                                                     | Comfortable to wear          |
| 9   | Exhalation valve   | Exhalation valve (Polypropylene) (Upper & Bottom cover) | Exhalation valve             |
| 10  | Marking            | Ink jet printing                                        | Product Introduction         |

### Notes:

- Dimension:  
 Longelastic strap: 360±10mm;  
 Short elastic strap: 300±10mm.
- Elasticity of the strap: 10N/10s at full extended length.
